GetPhysical B2C App: Consolidated User Flow & Field Matrix

Version 1.0 · October 25, 2026 · Figma handoff spec · Scope: B2C individual user (iOS and Android, React Native + Supabase)

How to read this document

- **[LOCKED]**: decided in our discussion. Build as written.
- **[NEW]**: added to close a gap found while consolidating. Needs your confirmation before handoff.
- **[OPEN]**: decision still pending. Design with a placeholder.
- Each screen lists: **Elements**, **Actions**, **States** (empty, loading, error) and **System** (what the backend does).

---

0. Global Rules (apply to every screen)

0.1 Navigation [LOCKED]

Fixed bottom bar, 5 tabs, visible on all main screens:

1. **Sodia** (default landing; social feed)
2. **Discover** (Mapbox map and search)
3. **Cards** (center, elevated FAB; 3D VIP card carousel). *Canonical name is "Cards". Earlier drafts said "Wallet"; retire that label.*
4. **Track** (top toggle: Lift / Move / Food)
5. **Profile**

Users can change the default launch screen in Settings (Sodia or Cards).

0.2 Roles on one account [LOCKED]

- **Individual**: everyone.
- **Staff/Owner**: sees "Switch to Business Mode" in Settings (native QR scanner and waitlist manager).
- **Coach**: sees "Switch to Coach Dash" in Settings (client roster and program builder).
- One login can hold several identities. The "Post As" toggle chooses which identity publishes.

0.3 Security rules [LOCKED]

- **QR generation: zero friction.** Tapping a card generates a dynamic hash QR that expires every 60 seconds (Two-Gate Verification). No FaceID or fingerprint.
- **Payments: high friction.** Biometrics are required only on "Confirm & Pay" (day pass, court booking, subscription).
- Auth: two-token JWT. Refresh token is stored in the OS Secure Enclave. Biometric prompt only when the token is stale or locked.

0.4 Verification rules [LOCKED]

- Tracker stamps (Lift, Move, Food) are generated by the system and are not editable by the user.
- Challenge entries must come from a logged tracker session. No manual typing of results.
- Lift challenges require a video. Move challenges auto-sync GPS, pace and time from the Move tracker or a wearable.

0.5 Actionable-object principle [LOCKED]

Any facility tag, coach widget or challenge on a post, story or repost renders as a tappable CTA that opens a bottom sheet. It never navigates away. CTAs are fully preserved on reposts and shares.

0.6 Payments [LOCKED / OPEN]

- Xendit xenPlatform split payments. GetPhysical is never merchant of record.
- One universal checkout bottom sheet, identical from every entry point.
- **[OPEN]** Fee model: Option A flat 5-10% on all transactions, or Option B fixed ₱10/₱15 on one-time payments plus 5-10% on memberships. Fees are paid by the consumer. Design the checkout summary with a "Service fee" line either way.

0.7 Field limits [LOCKED]

- Post caption: 280 chars
- Challenge entry caption: 150 chars
- Bio: 150 chars
- Fitness goals at signup: min 1, max 5
- Stories expire 24 hours after posting
- Coach free tier: 3 clients

0.8 Global UI primitives

- **Bottom sheet**: facility checkout, repost options, workout log picker, map pin card.
- **Pill button**: facility CTAs ("Drop In", "Get Pass", "Book Court", "Join Queue"), filter chips, activity badges.
- **FAB**: New Post, New Message, Center on Me, Compare, List View.
- **Stamp**: transparent, resizable sticker overlaying photos/video (see Phase 5.5).

PHASE 1: Identity, Auth and Onboarding

Screen 1: Splash [LOCKED]

- **System check** on launch: look for an encrypted JWT.
  - Condition A, token fresh: route to Sodia.
  - Condition B, token stale or locked: native biometric prompt. Success refreshes the token and routes to Sodia. Failure falls back to Auth Landing.
  - Condition C, no token: route to Auth Landing.
- **[NEW] Force-update state**: if the app version is below the minimum, show a blocking "Update required" screen with a store link.
- **[NEW] Offline state**: if there is no network and a valid token exists, open Sodia in read-only cached mode with an "Offline" banner. Cards tab still shows owned passes (QR generation requires connection; show "Connect to show QR").

Screen 2: Auth Landing [LOCKED]

- **Elements**: Phone number field (numeric pad, +63 default prefix), primary button "Send OTP", secondary buttons "Continue with Apple" and "Continue with Google".
- **[NEW] Legal line** under buttons: "By continuing you agree to the Terms and Privacy Policy" with tappable links.
- **States**: invalid number (inline error), rate-limited ("Too many attempts, try again in X minutes"), no network (retry banner).
- **[NEW] Social-login edge case**: if Apple/Google returns no phone number, route to a "Verify your phone" step using the OTP flow, so every account has a verified phone.

Screen 3: OTP Verification [LOCKED]

- **Elements**: 6-box numeric grid (auto-advance, paste support, SMS autofill), countdown "Resend in 30s" that becomes a tappable "Resend Code".

- **States**: wrong code (boxes shake, red border, "Incorrect code"), expired code, too many failures (lockout message).
- **System**: on success issue two-token JWT, store refresh token in Secure Enclave. New user routes to Profile Setup. Returning user routes to Sodia.

Screen 4: Basic Info [LOCKED]

- **Elements**: profile picture circle (camera or gallery), First Name, Last Name, Username (@ format).
- **System**: username uniqueness validated live (green check or red "Taken" with 3 suggestions [NEW]). Allowed characters: letters, numbers, underscore, period.
- **[NEW] Age gate**: date of birth field. Under-18 accounts are blocked or routed to a restricted flow. **[OPEN]** minors policy.

Screen 5: Preferences [LOCKED]

- **Elements**: Home Location (city or neighborhood search), Fitness Goals as multi-select pills (min 1, max 5; e.g. Weightlifting, Tennis, HIIT, Running, Pickleball, Pilates, CrossFit), button "Complete Profile".
- **System**: goals are the Identity Signal for the Weighted Ranking Engine (WRE).

Screen 6: Find Friends [LOCKED]

- **Elements**: "Sync Phone Contacts" button (triggers OS permission), list of contacts already on GetPhysical with "Follow" buttons, bottom button "Skip for now" / "Go to Sodia Feed".
- **States**: permission denied (show "Search by username" fallback), zero matches (show suggested accounts near the user's home location).

[NEW] Permission primers

Before each OS prompt, show a one-screen explainer so the user is less likely to tap "Don't Allow":

- **Location** (Discover, Location Lock challenges, check-in): "We use your location to find clubs and verify challenge lifts."
- **Notifications**: likes, bookings, waitlist, check-in prompts.
- **Camera and microphone**: stories, lift videos, QR scanning.
- **Photos**: albums, uploads.
- **Contacts**: Find Friends.
- **Health/Fit**: wearable sync (asked only when the user opens Integrations).

PHASE 2: Sodia (The Social Engine)

2.1 Sodia Main Feed [LOCKED]

- **Header tray, Stories**: horizontal row of circular avatars. First circle is the user's own avatar with "+" ("Your Story"). A colored ring means unseen stories. A grey ring means seen.
- **Top navigation icons**: Heart (Activity feed, see 2.8) and Paper plane (Inbox, see 2.9). Both show unread badges.
- **FAB**: "+ New Post" (bottom right, above the nav bar).
- **Feed logic (WRE)**: chronological base of followed accounts, with an algorithmic Discovery Card injected every 4th or 5th slot. Discovery Cards can be a nearby gym promo, a PR Challenge, a Coach Pro offer or a court open-play queue. They are labeled "Suggested".
- **Interactions**: pull to refresh, infinite scroll, double-tap to like.
- **States**: new user with empty feed (show Find Friends prompt and suggested accounts), loading skeletons, error with retry, offline cached.

2.2 Stories Engine (24-hour expiry) [LOCKED]

Story Creation Modal

- **Viewfinder**: full-screen camera. Tap shutter for photo, hold for video. Flip camera, flash, gallery shortcut [NEW].
- **Tool tray**: Add Text, Location Tag, Tracker Stamp (macro breakdown, Move GPS map or Lift summary).
  - Location Tag queries the Facilities table and generates a tappable booking pill.
  - Tracker Stamp drops as a floating widget the user can pinch, drag and tap-to-invert.
- **[NEW] Post As toggle** at top (Personal vs Gym/Coach identity, if user holds one).
- **Primary button**: "Post to Story" (sets expires_at = now + 24h).
- **[NEW] Story settings**: audience (Followers / Close Friends [OPEN]), allow replies toggle.

Story Viewer

- Segmented progress bar at top. Tap right = next, tap left = previous, swipe down = exit.
- Floating action pills from Location Tags (e.g. "Book Court"). Tapping opens the checkout bottom sheet over the story, which pauses playback.
- Bottom input "Send Message" routes to the Inbox.
- **[NEW] Own-story view**: viewer list, delete story, save to album.
- **States**: expired story ("This story is no longer available"), blocked or private account.

2.3 Create Sodia Post [LOCKED]

- **Elements**: select photo or video (gallery or camera), caption (280 chars), "@ Tag Facility" (auto-generates the point-of-sale pill), "@ Tag Friends" (queries Users), optional widget attachments ("Attach Macro Data", "Attach Lift/Move Stats"), button "Post".
- **[NEW] Post As** toggle (Personal vs Gym vs Coach).
- **[NEW] Post options**: allow comments toggle, hide like count toggle, add to album.
- **Automated check-in draft [LOCKED]**: after a QR scan at the turnstile, a push says "Checked into [Facility]. Add a quick photo to your check-in?" Tapping opens this modal pre-tagged with the facility.
- **System**: if a Facility is tagged, the post auto-renders the correct CTA by registry.

2.4 Standard Feed Post (Viewer) [LOCKED]

- **Header**: avatar, @username, Location Tag (facility name) beneath the handle, overflow menu ("...") [NEW: Report, Hide, Mute, Copy link, Delete if own].
- **Media**: photo, video (autoplay muted), carousel dots if multiple.
- **Verified stamp** overlay if a tracker widget is attached.
- **Dynamic CTA pill** (only if a facility is tagged), beside the location tag or on the image corner:
  - Registry A (Commercial Gyms): "Drop In" or "Get Pass"
  - Registry B (Courts and Clubs): "Book Court" or "Join Queue"
  - Tapping slides up the Facility Bottom Sheet (cover photo, live capacity, payment options).
- **Action row**: Like (heart), Comment (bubble), Repost (arrows), Share (send to DM).
- **Counts**: likes and comments below the action row. Caption with "more" truncation.

2.5 Comments [NEW]

- Bottom sheet or full thread: avatar, username, comment text, time, Like and Reply links, nested replies (one level).
- Input field with emoji key, @mention search, "Post" button.
- Own comment: long-press to delete. Others: long-press to Report.
- Facility owners and post authors can pin one comment.
- **Challenge posts**: the thread is anchored by the live Leaderboard (see 2.7).

2.6 Repost and Quote [LOCKED]

- **Repost Bottom Sheet** (triggered by arrows icon): "Quick Repost" (instant; shows "Reposted by [User]" tag) or "Quote / Add Thoughts".
- **Quote Creation Modal**: original post embedded as a small static card, caption (280 chars), button "Post".
- **Preservation rule**: location tags, macro breakdowns, booking pills, stamps and challenge buttons remain clickable in the repost.
- **[NEW] Undo**: "Undo Repost" in the same sheet if already reposted.
- **System**: purchases from a repost can be attributed to the reposter for future affiliate or referral reporting **[OPEN]**.

2.7 Verified PR Challenges [LOCKED, with [NEW] detail]

Who can create: any User (public challenge) or a Facility (hosted local event).

Create Challenge Modal [NEW, fields to confirm]

- Title (e.g. "Heaviest Deadlift in Makati")
- Challenge type: Lift (exercise picker from the Exercise DB, metric: 1RM, max reps, or volume), Move (distance, fastest time, or pace for a chosen activity), Court [OPEN]
- Metric and ranking rule (heaviest, fastest, most reps)
- Start and end date/time
- Location Lock toggle (Facility picker; entries must be logged inside that facility's geofence or via VIP card check-in)
- Eligibility: Open to all, Followers only, or Facility members only
- Prize or bounty text (optional)
- Cover image, description
- Button: "Post Challenge"

Challenge Post (Viewer)

- Fiery "Accept Challenge" button replaces the standard facility CTA. Shows participant count, time remaining and top 3 mini-leaderboard.
- **System on accept**: the goal is injected into the user's Lift or Move tracker as an active bounty. The user's profile "Active Challenges" count increases.

Submit Entry Modal

- **Dynamic upload**: Upload Video for Lift. Move bypasses to auto-sync.
- **Data selector** "Choose Workout Log": bottom sheet listing recent verified sessions that match the challenge criteria.
- **Caption** (150 chars, optional smack talk).

- Button "Submit Entry".
- **System**: system overlays an un-editable stamp (weight and reps, or GPS route, pace, time) on the video or graphic. The entry posts as a linked reply on the original post and the pinned Live Leaderboard updates rank immediately.
- **Location Lock check**: if enabled, validate GPS or check-in. On failure show "This lift must be logged at [Facility]" and block submission.
- **[NEW] States**: challenge ended, not eligible, entry rejected (stamp mismatch), duplicate entry (replace best attempt rule [OPEN]).

Live Leaderboard (pinned in comments)

- Rank, avatar, username, result (weight, pace or reps), verified badge, time submitted. Tapping a row opens that entry.
- Own row is highlighted and sticky if off-screen.
- Entries appear on the entrant's Profile Tab 2 (PRs and Entries).
- **[NEW] Challenge closure**: winner banner, top 3 posted automatically, optional prize claim flow.
- **[NEW] Report entry**: any viewer can flag a suspicious entry for review (see Phase 7).

2.8 Activity / Notifications (Heart Menu) [LOCKED]

- **Access**: Heart icon, top navigation of the Sodia feed. Unread badge on the icon.
- **Segmented tabs (top)**: "All Activity" and "Follow Requests" (visible when the account is private; shows count).
- **Row types**:
  - Like: [Avatar] "[User] liked your post." + post thumbnail.
  - Comment / reply / @mention: preview of the comment text + thumbnail.
  - Follow: "[User] started following you." + "Follow Back" button.
  - Follow request: Accept and Decline buttons.
  - Challenge alert: "[User] accepted your Deadlift Challenge." Also [NEW]: "You were passed on the leaderboard", "Challenge ends in 2 hours", "You won".
  - Repost / quote of your post [NEW].
  - Tag: "[User] tagged you in a post" [NEW].
- **Grouping [NEW]**: sections "Today", "This Week", "Earlier". Mark all as read.
- **States**: empty ("Nothing yet. Post or accept a challenge to get things moving."), loading, error.

2.9 Inbox and Direct Messages [LOCKED]

Inbox Main List

- Search bar "Search Messages" (queries active threads).
- Row: avatar, username, message preview, timestamp. Unread = bold text plus colored dot.
- FAB "New Message".
- **[NEW] Tabs**: "Primary" and "Requests" (messages from non-followed accounts). Swipe actions: mute, delete.

Direct Message Thread

- Header: username, avatar. Tapping the header opens the profile. Overflow menu [NEW]: mute, block, report.
- Chat viewport: scrolling bubbles, timestamps, read receipts [NEW, toggle in Privacy].
- Input: expanding text area (up to 4 lines), Send (arrow), Attach (paperclip: photo, workout log, gym link).
- **Interactive bubbles**:
  - Shared tracker stamp (Lift, Move, Food). Friend sees "Congratulate" (fire reaction) and, if it was a PR, "Accept Challenge".
  - To a connected Coach Pro: bubble includes deep link "View Raw Data" (set-by-set grid or GPS splits).
  - Shared post or story reply: renders as a mini card.
- **B2B Staff Handshake Card** (official invite from GymDash): branded card "[Facility Name] has invited you to join as [Role]." Button "Review & Accept" opens the Terms modal. States: pending, accepted, declined, expired [NEW].
- **States**: new-thread empty state, message failed to send (retry), blocked user.

2.10 User Profile [LOCKED]

Main view

- Cover photo (banner), circular profile picture.
- First name, last name, @username, bio (150 chars).
- **Active Roster**: horizontal badges under the bio for active subscriptions and memberships (e.g. black "GetPhysical+" badge, "Twins Fitness" logo, "Pickleball Club" icon). Tapping a badge opens that facility's profile.
- **Metrics row**: Followers, Following, Active Challenges (each tappable, opens a list).
- **Action buttons**: own profile = "Edit Profile" and "Settings" (gear). Other profile = "Follow" (or "Requested" for private accounts) and "Message". Overflow for others [NEW]: Report, Block, Mute.
- **Tabs (horizontal swipe)**:
  1. **Feed**: 3-column photo/video grid.

2. **PRs and Entries**: verified challenge entries and tracker stamps (the Trophy Case). Every stamp shared to the feed pins here automatically.
3. **Locker**: past day passes, event tickets and expired memberships as a digital souvenir wall.
4. **Albums**: grid of folder-like cards (cover, title, count).

- **Private account state**: non-followers see header and counts only, with "This account is private. Follow to see their posts."

Followers / Following / Active Challenges lists [NEW]

- Searchable list with Follow or Following buttons. Own list allows removing a follower.
- Active Challenges list: challenge title, current rank, time left, "Submit Entry".

Edit Profile Modal [LOCKED]

- Change Profile Picture, Change Cover Photo, Name, Bio (150), Top Activities as multi-select pills (updates the algorithm), "Save Changes".
- **[NEW]** Username change (limit once per 30 days), Home Location, website link [OPEN].

2.11 Photo Albums [LOCKED]

- **Albums tab**: large "Create New Album" card with "+", then grid of albums with cover, title, item count. Lock icon for private albums.
- **Create / Edit Album Modal**: Album Title (e.g. "Summer Bulk"), Description (optional), Select Cover Photo, Add Media (multi-select grid; pick existing Sodia posts or upload from camera roll), Private Album toggle (only visible to the owner, intended for progress photos), "Save Album". Edit adds Delete Album with a confirmation.
- **Inside an Album**: title, description, date range, masonry or chronological grid. Select mode: pick photos to move, remove or delete [NEW].
- **Progress View**: selecting two photos shows a floating "Compare" FAB. Opens a side-by-side or slider Before and After overlay with "Share to Feed" and "Share to Story".
- **Coach tie-in**: a coach's "Transformations" tab is an Album variant (client consent required [NEW]).

2.12 Facility Sodia Profile (Registry A: Gyms) [LOCKED]

- **Header**: facility cover photo, circular logo, name, address and distance (e.g. "2.4 km away"), bio and hours.
- **Live status [NEW]**: open/closed now, live capacity ("12/50 active").
- **Primary action (large)**: "Buy Day Pass (₱250)" or "View Memberships". Opens the universal checkout sheet.

- **Secondary**: "Follow", "Bookmark", "Get Directions" (native Apple/Google Maps).
- **Tabs**:
  1. Feed: the gym's official posts (promos, events, equipment tours).
  2. Community: public posts and PR Challenges that tagged this facility.
  3. Coaches: roster of Coach Pro users operating from this gym, linking to coach profiles.
  4. **[NEW] Info**: amenities, photos, rules, contact, social links.
  5. **[NEW] Challenges**: active and past challenges hosted here.
- **Registry B variant (Courts and Community Clubs) [NEW detail]**: primary button "Book Court" or "Join Queue", court list with live availability, upcoming events and open-play sessions, member count, "Join Club" (free up to 19 members on the club side).

2.13 Coach Pro Sodia Profile [LOCKED]

- **Header**: cover photo, profile picture, coach name, certifications (e.g. NASM-CPT), bio, specialty tags [NEW], gyms they operate in [NEW].
- **Primary button**: "Train with Me". Opens a DM with a pre-filled inquiry, or joins the waitlist if the roster is full.
- **States [NEW]**: roster full ("Join Waitlist"), already a client ("Message Coach"), coach not accepting clients.
- **Tabs**: Feed, Templates (coach-made custom templates shared as copies; no paid packages in v1), Transformations (before-and-after album).
- **[**LOCKED] No paid program packages in v1. Coaches share custom templates instead (see 8.2).

2.14 Algorithm Layer: Weighted Ranking Engine (WRE) [LOCKED]

Deterministic weighted ranking in a Supabase view. No black-box ML.

- **Signals**: (1) Identity (goals and top activities), (2) Social Graph (likes, messages, accepted challenges), (3) Tracker Exhaust (what they actually log; silently updates the profile weight), (4) Wallet History (where they spend).
- **Sodia**: chronological base plus a Discovery Card every 4th or 5th slot.
- **Discover**: Base Score = proximity. Multiplier 1 = friend check-ins (x1.5 when three friends booked there). Multiplier 2 = activity match with tracker data (x2.0).
- **[NEW] User controls**: "Not interested" on a Discovery Card, and a "Why am I seeing this?" link.
- **[NEW] Sponsorship rule [OPEN]**: whether facilities can pay to boost a card. If yes, it must carry a "Sponsored" label.

PHASE 3: Discover (Mapbox Engine)

3.1 Discover Map (Main View) [LOCKED]

- **Map**: full-screen Mapbox with branded pins.
- **Search bar (top)**: "Search gyms, clubs, or coaches..."
- **Filter pills (horizontal scroll)**: All, Gyms, Pickleball, Basketball, Run Clubs (queries Registry A or B). **[NEW]** Add Coaches, Challenges, Open Now, and a Filters button (price, distance, rating, amenities).
- **FABs**: "List View" (toggles to a scrolling directory) and "Center on Me" (GPS crosshair, bottom left).
- **Dynamic pins**:
  - Standard: facility logo (Registry A or B).
  - Event/Challenge pin: glowing with a fire/trophy badge when the facility has an active Verified PR Challenge.
  - Coach pin (temporary): a freelance Coach Pro hosting a public-park session can drop a 24-hour pin.
  - **[NEW]** Cluster pins with count when zoomed out.

3.2 Map Pin Bottom Sheet [LOCKED]

- Half-height cover photo, name, distance.
- Live Capacity ("12/50 currently active") or Court Status ("2 Courts Available").
- Primary button "View Facility" (routes to the Facility Profile).
- Secondary: "Bookmark / Save" (ribbon icon) and "Get Directions" (opens native maps).
- **[NEW] Challenge badge**: if the pin has an active challenge, show the challenge title and "Accept Challenge".
- **[NEW] Social proof**: "3 friends have checked in here".

3.3 Search Overlay [LOCKED]

- Auto-focused keyboard.
- Section 1, Recent Searches: past gyms/coaches with an "X" per row and "Clear all".
- Section 2, Trending Near You: top 3 most-booked facilities or active challenges in the user's radius (WRE ranked).
- Section 3, Browse by Category: icon grid (Free Weights, CrossFit, Pickleball, Pilates and so on).

- **Results (as typed) [NEW]**: grouped list for Facilities, Coaches, Users, Challenges, with a "No results" state and suggested alternatives.

3.4 List View [NEW detail]

- Sortable by Distance, Rating, Price, Open Now. Each row: cover thumbnail, name, distance, capacity or availability, price from, Bookmark.

3.5 Saved Facilities [NEW]

- Reached from the Bookmark ribbon or Profile menu. List of bookmarked clubs with quick "Buy Pass" or "Book" and remove.

3.6 Location Denied Fallback [LOCKED]

- Blurred map background, "We need your location to find nearby clubs and challenges."
- Primary button "Enable Location Services" (deep links to OS settings). Secondary input "Search manually by City or Zip Code".

PHASE 4: Cards (VIP Wallet and Fitness SOA)

4.1 Cards Hub (Main View) [LOCKED]

- **Top half, the wallet**: 3D vertical card stack of active memberships and passes.
  - Swipe up/down cycles cards.
  - Single tap on the center card flips 180 degrees to show the ticking QR (60-second hash) and current timestamp. Tap again to flip back. No biometrics.
  - Top right icon "+ Add Pass".
  - **[NEW] Card faces**: front shows facility logo, pass type, valid until, member name. Back shows QR, countdown ring and a manual-entry code fallback for scanners that fail.
  - **[NEW] Card states**: Active, Expiring soon (amber, within 3 days), Expired (greyed, moves to Locker after 7 days), Paused or Frozen (if supported by the facility), Day pass used today.
  - **[NEW] Brightness boost**: screen brightness auto-maxes on QR flip.
- **Bottom half, the Fitness SOA**: bottom-sheet ledger that scrolls over the cards.
  - Header "Recent Activity". Unified chronological list with no filter tabs.
  - Single-line ledger row: left color-coded icon (green payment, blue access, grey expiry); center `[Action] • [Facility Name]` (e.g. "Check-In • Nexus Pickleball", "Day Pass • Twins Fitness"); right `[Date/Time]` above `[Monetary Value]` (e.g. "-

₱250″).
    - Event types: purchase, renewal, refund [NEW], check-in/visit, expiry, cancellation [NEW], failed payment [NEW], waitlist joined [NEW].
    - **[NEW]** Tapping a row opens a detail sheet: receipt (amount, service fee, payment method, reference number), facility link, "Get Help" button.
    - **[NEW]** Search and date-range filter under the header, plus "Export statement (PDF)".
- **Empty state**: no cards yet, illustration with "Add your first pass", buttons "Scan QR" and "Find a Gym".

4.2 Join Facility Modal (triggered by +) [LOCKED]

- Button 1: "Scan QR Code" (native camera; the printed GetPhysical standee at the gym front desk opens that facility's profile and checkout).
- Button 2: "Search Directory" (text input for manual lookup).
- Section "Suggested near you": 3 nearby facilities from the WRE.
- **[NEW] States**: invalid or unrecognized QR ("This QR isn't a GetPhysical gym"), camera permission denied (manual entry fallback).

4.3 Universal Facility Checkout Bottom Sheet [LOCKED]

Opened identically from a Sodia pill, a map pin, a profile or a lobby QR scan.

- **Header**: facility cover, name, distance.
- **Inventory list (radio buttons)**: Day Pass (₱250), Monthly Subscription (₱1,500/mo, Registry A), Book Court (₱200/hr, Registry B). **[NEW]** Also event ticket / RSVP, coach enrollment, club membership.
- **[NEW] Court booking extras**: date and time slot picker, duration stepper, court selector, number of players, "Join Queue" if full.
- **Payment method selector**: shows the linked method (e.g. "Maya •••• 1234") or "+ Add Payment Method" (Maya, GCash, cards).
- **Summary**: item, service fee line [OPEN fee model], total amount.
- **Promo code field [NEW]**.
- **Primary button**: "Confirm & Pay" (biometric required).
- **System**: on success the pass is injected into the Cards stack, the Xendit split routes funds, a ledger row is written, and a confirmation sheet shows "You're in!" with "Show QR" and "Share to Sodia".
- **[NEW] Failure states**: payment declined, timeout, biometric failed (retry or PIN fallback), slot just taken, gym at capacity. Never double-charge; show a pending state until Xendit confirms.

- **[NEW] Terms**: cancellation and refund policy line per facility, shown before payment.

PHASE 5: Track (Trinity Tracker: Food, Lift, Move)

The Track tab has a top toggle: **Lift | Move | Food**. **[NEW]** Remember the last-used segment. A "Today" summary strip above the toggle shows workouts this week, calories remaining and weekly distance.

5.1 Food Tracker

Main Dashboard [LOCKED]

- **Macro Dash (top)**: 4 widgets for Calories (consumed vs target), Protein, Fats, Carbs. Date selector "< Today >" [carried from earlier draft].
- **Hydration row**: water droplet icon, daily counter (e.g. "1.5 / 3.0 Liters"), quick-add buttons "+ 250ml Glass" and "+ 500ml Bottle". **[NEW]** Tap the counter to edit a custom amount or undo the last add.
- **Logging engine (middle)**:
  - Left: "+" icon opens the Manual Log Modal.
  - Right: wide search bar powered by Nutritionix ("Search food & cooking method..."). Natural language is supported ("2 boiled eggs and a cup of rice" parses into separate items with macros in one tap).
  - **Barcode scanner icon** inside the search bar (native camera) [carried from earlier draft; keep].
  - **Quick-Log slider**: horizontal pills of saved "My Meals" (e.g. "Morning Oats", "Post-Workout Shake") for one-tap logging.
- **Meal sections [carried]**: Breakfast, Lunch, Dinner, Snacks, each with logged items (name, serving, calories) and a section-specific "+ Add Food". **[NEW]** Swipe an item to delete or duplicate.
- **Daily Food History (ledger)**: single-line chronological list of today's meals, capped at 5 visible rows, then "View Monthly Calendar".
- **Target Macro Dash (bottom)**: NASM-powered readout of Target Calories, current BMR and TDEE, with "Recalculate Targets".
- **Ecosystem hook**: FAB "Share Daily Macros" opens the Sodia story/post modal with the Food Stamp (closed macro rings and calorie target).
- **States**: first run (prompt to set targets via the NASM calculator), nothing logged today, search no-results ("Add it manually"), Nutritionix error or offline (use recent and favorites cache; allow manual log).

Add Food and Food Detail [LOCKED]

- Search results rows: food name, brand, base serving, base calories; tap row opens detail; "+" quick-adds the base serving.
- Filter pills: Recent, Favorites, My Meals.
- **Food Detail bottom sheet**: name and brand, macro split (mini pie or bar), Serving Size (numeric), Measurement Type dropdown (grams, cups, pieces, slices), live recalculation, "Log Food". **[NEW]** "Add to Favorites", meal selector.

Manual Log Modal [LOCKED]

- Food Name, Weight/Amount, Cooking Method dropdown (Raw, Grilled, Boiled and so on), manual macro overrides (Calories, Protein, Carbs, Fats), "Log Food". Includes the Quick Add path for meal-prep services (Meal Name optional, then macros, "Save & Log").

NASM Target Calculator [LOCKED]

- Inputs: Age, Sex, Weight, Height, Activity Level dropdown, Goal dropdown. Button "Calculate & Set Targets". Results: BMR, TDEE, target calories, macro split. **[NEW]** Manual override of targets.

Create My Meal [NEW]

- Name, add multiple foods, save. Appears in the Quick-Log slider.

Monthly Calendar [NEW detail]

- Month grid with a color dot per day (under, on, over target). Tap a day to open that day's log.

5.2 Lift Tracker

Lift Dashboard [LOCKED]

- **Workouts This Week**: 7-day calendar row with check marks.
- **Action buttons**: "Quick Start" (empty workout), "Create Template", "Build Program (Periodization)".
- **Active program card**: if a program is active, show "Week 3, Day 2: Heavy Squats" with a large "Start Workout" button.
- **My Templates**: grid of saved routines. Tapping starts a pre-loaded workout.
- **Recent History**: date, title, duration, total volume.
- **[NEW] Active Challenges (bounties)**: cards injected when the user accepted a Sodia challenge ("Heaviest Deadlift in Makati"), with "Log Attempt".
- **[NEW] PR board**: per-exercise best weight, estimated 1RM and date.

Active Workout Engine [LOCKED]

- **Sticky header**: editable Workout Title, Live Timer, Calculator icon (1RM), "Finish".
- **Exercise block (repeats)**: name; "..." menu (swap, remove, view history); logging grid with columns Set, Previous (grayed last-time value, e.g. "225 x 8"), Weight, Reps, Status (large checkmark; turns green and starts the Rest Timer); "+ Add Set".
- **Bottom**: "+ Add Exercise".
- **[NEW] Rest timer**: floating countdown with +15s / -15s / Skip, default per exercise, haptic and notification at zero.
- **[NEW] Set types**: warm-up, working, drop, failure.
- **[NEW] Units**: kg or lbs toggle (account-level setting).
- **[NEW] Auto-save and recovery**: draft saved every set so a crash or app close can resume ("Resume workout?").
- **[NEW] Discard workout** confirmation.
- **PR detection**: when a logged set beats the previous best, show a PR flag in the row.
- **Challenge mode**: if the workout was started from a challenge bounty, the set is tagged to the challenge and, on Finish, offers the Submit Entry flow with the video attach step.

Exercise Database and Selector [LOCKED]

- Search "Search exercises...", filter pills (All, Chest, Back, Legs, Core, Arms), text-only rows, "+ Custom" (top right) for unlisted exercises. **[NEW]** Recent and Favorites sections, multi-select add.

1RM Calculator Modal [LOCKED]

- Inputs: Weight Lifted, Reps Performed. Output: massive "Estimated 1RM" (Epley or Brzycki). Percentage table (95%, 90%, 85% and so on with exact loads). Button "Close". **[NEW]** "Use as target" to push a percentage into the current set.

Template Builder [NEW detail]

- Template name, add exercises, default sets, reps and rest, save. Edit, duplicate, delete.

Periodization Programmer [LOCKED]

- **Setup**: Program Name, Duration (4, 6, 8 or 12 weeks), Progression Logic toggle (Linear: add X kg/lbs per week, or Percentage Based: tied to 1RM).
- **Calendar view**: horizontal Week 1 to Week X, "+ Add Template" per day.
- **System**: saving updates the dashboard header with the current week/day workout and auto-calculates loads. **[NEW]** Mid-program edit, pause, skip a week, end program.

Workout Complete Modal [LOCKED]

- Confetti or badge, metrics row (Duration, Total Volume, New PRs Hit, e.g. "Bench Press: 225 lbs x 5").

- Primary CTA "Share to Sodia" (opens the share harness with the Lift Stamp and camera). Secondary "Save & Close".
- **[NEW]** Edit title and notes; add a rating or effort score [OPEN].

5.3 Move Tracker

Move Dashboard [LOCKED]

- **Weekly Mileage** ring or bar against the weekly goal. **[NEW]** Set goal modal.
- **Actions**: "Start GPS Activity" (large), "Sync Device" icon, "Manual Entry" (top right; treadmill and indoor).
- **Recent Activities**: date, activity icon, distance, total time.
- **[NEW] Active Challenges (bounties)** for Move challenges, and personal records (fastest 5K, 10K, longest run).

Universal Activity Selector [LOCKED]

- Search bar "Search activity..."
- Categorized grid:
  - Endurance and GPS: Run, Walk, Cycle, Hike, Trail Run.
  - Water: Swim (Pool), Swim (Open Water).
  - Multisport: Triathlon, Duathlon, Aquathlon.
  - Racket: Pickleball, Tennis, Badminton, Squash.
  - Ball and Team: Basketball, Volleyball, Football/Soccer.
  - Mind and Body: Yoga, Pilates, Mobility.
  - **[NEW]** Padel (core to the Philippine market), plus Recent and Favorites rows.

Activity Setup Bottom Sheet [LOCKED]

- Activity type, Indoor/Outdoor toggle (GPS on or off), "Start" with a 3-2-1 countdown. **[NEW]** Auto-pause toggle, audio cues, GPS accuracy indicator, link to a challenge.

Live Tracker, GPS mode [LOCKED]

- Top half: live Mapbox with the trail line. Bottom half: Distance (massive), Active Time, Current Pace.
- Action row: Pause, Lock (prevents accidental taps). Paused state: Resume and Finish Workout.
- **[NEW]** Background tracking with a persistent notification, GPS lost warning, low-battery safeguard, crash recovery of an unfinished activity.

Live Tracker, Multisport mode [LOCKED]

- Total Time at top, central metrics swap by leg (Swim Pace, Bike Speed, Run Pace). Action row: "Transition (T1/T2)" and "Start Next Leg" replace Pause.

Live Tracker, Court mode (non-GPS) [LOCKED]

- Pulsing active timer and live Heart Rate ring (if a wearable is synced) replace the map.
- Post-workout prompt: Match Result (Win/Loss) and Final Score (optional), feeding the Sodia feed for rivalry tracking. **[NEW]** Opponent or partner tag (@user) and Facility tag (suggests the nearest facility; check-in match).

Cardio Complete Modal [LOCKED]

- Static zoomed-out Mapbox route image, metrics (Total Distance, Average Pace, Elevation Gain, Calories Burned), splits table (Km 1: 5:30, Km 2: 5:45 and so on), "Share to Sodia" (Move Stamp with route and pace), "Save & Close". **[NEW]** Edit title, notes, delete activity, trim accidental start/stop.

Manual Entry [LOCKED]

- Activity type, date and time, duration, distance, optional notes. **[NEW rule]** Manual entries are marked "Manual" and are not eligible for challenge entries (see 0.4).

Wearable Integration modal [LOCKED]

- Toggles: Apple Health, Google Fit, Garmin Connect, Strava. Background polling for new workouts; local notification "New run detected from Apple Watch. Tap to view your splits."
- **[NEW]** Duplicate detection (same run from watch and phone), sync status, last synced time, disconnect.

5.4 Challenge Bounty Integration across trackers [LOCKED, detail NEW]

- Accepting a challenge on Sodia injects a bounty card into Lift or Move.
- **Completion**: Finish workout, tap "Submit Entry" on the summary, choose the matching log (bottom sheet), attach video (Lift only), caption, submit.
- **Validation**: log must be tracker-created (not manual), within the challenge window, and, if Location Lock is on, inside the facility geofence or backed by a VIP card check-in within the same time window.

5.5 The Sodia Harness: Universal Share Flow [LOCKED]

Tamper-proof graphic stamps

- Lift Stamp: "Verified PR" badge, total volume, heavy lifts.
- Move Stamp: route line, distance, average pace.
- Food Stamp: closed macro rings and calorie target.

Distribution Modal ("Share Activity")

- "Add to Story": pushes the stamp to the 24-hour story.
- "Post to Feed": opens the post creator with the stamp attached (can double as a challenge entry).
- "Send via Message": opens the Inbox contact list.
- **[NEW]** "Save to Album" and "Save to Photos".

Stamp editor (sticker behavior)

- The camera viewfinder or gallery (including Albums) opens, and the stamp drops as a transparent floating widget.
- Pinch to resize, drag to reposition, tap to invert Light/Dark.

DM behavior

- To a friend: interactive bubble with "Congratulate" and, for a PR, "Accept Challenge".
- To a Coach Pro: bubble includes "View Raw Data" deep link to the set-by-set grid or GPS splits for compliance review.

Trophy Case

- Every verified stamp shared to the feed auto-pins to Profile Tab 2 (PRs and Entries). **[OPEN]** Whether the user can unpin or hide an entry. Verified entries stay immutable, but visibility is a separate setting.

PHASE 6: Settings (Profile gear icon)

Grouped list. Order is fixed.

A. Business and Operations (top of list) [LOCKED]

- **Switch to Business Mode**: visible only to gym staff or owners. Switches the UI to the native QR scanner and waitlist manager.
- **Switch to Coach Dash**: visible only to active coaches. Opens client roster and program builder.
- **[NEW]** Identity chooser for users holding several roles; returns to personal mode with one tap.

B. Account (identity and financials; tied to the user's auth token, not the device) [LOCKED]

- **Payment Methods**: link Maya, GCash or credit cards. **[NEW]** Set default, remove, add a billing name, failed-method warning.

- **Subscriptions**: manage GetPhysical+ (₱149/mo) and active gym memberships. Per row: status, next billing date, amount, "Cancel" or "Pause" (if the facility allows), invoice history. **[NEW]** Cancellation confirmation with what the user keeps until period end.
- **Personal Info**: phone number, email, passwordless biometrics (FaceID). **[NEW]** Change phone (re-verify via OTP), add or verify email, connected Apple/Google accounts, units (kg/lbs, km/mi), date of birth, sex, height and weight (feeds the NASM calculator), language.
- **Privacy**: Private Account toggle (follow requests need approval), blocked users list. **[NEW]** Who can message me (Everyone, Followers, No one), who can tag me, read receipts, activity status, show or hide Active Roster badges, default visibility for challenge entries, personalized suggestions toggle (WRE), location sharing preference.
- **[NEW] Account actions**: download my data, deactivate, delete account (confirmation, grace period, explains what happens to active passes and subscriptions first).

C. App Settings (device-local preferences) [LOCKED]

- **Theme and Display**: Light / Dark / System Default. **Default Launch Screen**: Sodia or Cards.
- **Notifications**: toggles for Sodia likes, comments, new followers, challenge updates, upcoming court bookings, waitlist alerts. **[NEW]** Pass expiring reminders, payment receipts, check-in prompts ("Add a photo to your check-in?"), message notifications, marketing offers, quiet hours.
- **Integrations**: connect Apple Health, Google Fit, Garmin, Strava (same modal as 5.3). **[NEW]** Per-integration permissions and a sync-now button.
- **[NEW] Permissions overview**: shows location, camera, notifications, contacts, photos and health status, with links to OS settings.

D. Support and Legal [NEW]

- Help Center / FAQ, Contact Support (opens a chat form with the ledger transaction pre-attached when launched from a ledger row), Report a Problem, Terms, Privacy Policy, Data Privacy Act rights request, app version, licenses, log out.

PHASE 7: Safety, Moderation and Global States [NEW]

7.1 Report, Block, Mute

- Available on posts, stories, comments, profiles, messages, challenge entries, facilities and coaches.

- Report sheet: reason list (spam, harassment, nudity, hate, scam, dangerous, fake or cheated entry, under-age user, other), optional note, "Submit". Confirmation screen with "Block" and "Mute" follow-ups.
- Block: removes mutual visibility, follows, and DM access. Mute: hides content without notifying.

7.2 Challenge Integrity

- Auto-checks: tracker-created log, timestamp inside window, plausible values (e.g. flagged if a lift jumps more than a set threshold vs history) [OPEN threshold], video attached for Lift, geofence or check-in for Location Lock.
- Flagged entries show "Under review" and do not appear on the public leaderboard until cleared. Challenge host (user or facility) can also dispute an entry.
- Removed entries show a reason to the user and a "Request review" button.

7.3 Content and Minors

- Automated nudity and violence screening on upload (blurred pending review).
- Progress photos in private albums are never visible to others and are excluded from any recommendation surface.
- **[OPEN]** Policy for users under 18 (restricted DMs, no public location tag, no paid subscriptions without a guardian).

7.4 Global States (every screen must define these)

- **Loading**: skeletons, never blank screens.
- **Empty**: illustration, one-line explanation, one primary action.
- **Error**: friendly message and "Retry"; distinguish no network, server error, permission denied.
- **Offline**: banner. Allowed offline: view cached Sodia, log Food, log Lift sets, record Move activity (sync later), view owned cards (QR requires connection or a cached fallback code [OPEN]).
- **Session expired**: re-auth with biometric, preserve in-progress drafts.
- **Accessibility**: dynamic type, VoiceOver and TalkBack labels, minimum 44 pt touch targets, color is never the only indicator (ledger icons also use shape), captions on video [OPEN].
- **Localization**: English first; Filipino (Tagalog) strings and ₱ formatting ready from the start.

PHASE 8: Headstart, Progress and Engagement (added Oct 25)

These additions came from the inspo review. Decisions made: the Explore tab and tutorial video library are retired, program sharing is limited to custom programs, and Journal, HR zones and non-pass payments are deferred. Tags: **[LOCKED]** decided, **[NEW]** proposed detail, **[OPEN]** pending (collected in 8.11).

8.1 Headstart (inside Track > Lift) [LOCKED, detail NEW]

- **Entry**: a new "Headstart" button on the Lift Dashboard, beside Create Template and Build Program. It replaces the Explore tab from the inspo.
- **Headstart Home**: two cards, "Exercise Bank" (free) and "Build a starter program" (GP+).
- **Exercise Bank (free)**: search, muscle-group filter pills, and a body diagram in the header (tap a muscle to filter; this is the Learn section). Each row opens a text-only exercise card: target muscles, equipment, 3-4 setup cues, common mistakes, "Add to workout", "Add to template", Bookmark. No videos. The same exercise table feeds the Exercise Selector in the Active Workout (5.2).
- **Program wizard (GP+; one free run for non-members)**: four steps. Goal (strength, muscle, general fitness), experience (beginner, intermediate, advanced), days per week (2-6), equipment (full gym, dumbbells only, bodyweight). Rule-based, assembled from the exercise bank. No AI generation.
- **Review screen**: exercises listed per day with swap, remove and add. Buttons "Save as Template" or "Save as Program" (lands in My Templates or the Periodization calendar).
- **Paywall state**: after the free run, a non-member sees an upgrade sheet with the GP+ price (₱149/mo) and a Subscribe button that opens checkout.
- **Headstart tag**: every wizard-generated program carries a permanent "Headstart" tag. Editing it does not remove the tag, and tagged programs cannot be shared (see 8.2).
- **Periodization programmer (5.2)**: proposed as a GP+ feature. [OPEN]

8.2 Sharing Programs [LOCKED]

- A Share button appears only on custom templates and programs the user built themselves. It is hidden on Headstart-tagged programs.
- Destinations: DM to a friend, or a program card posted to Sodia.
- The recipient gets a **static copy**. They can edit their copy, but there is no live link and they never see the owner's logs.
- **DM card**: program name, days per week, exercise count, button "Save a copy".

- Coach-made programs show "Created by Coach X" with a "Train with me" button. Coaches have an "Allow clients to share" toggle: on for general templates, off for personalized client plans.
- States: copy saved, already saved, original later deleted by the sender (the copy remains).

8.3 Bookmarks [NEW]

- **Entry points**: bookmark icon on posts, facilities, challenges, exercises and shared program cards, plus a "Bookmarks" row in the Profile menu.
- **Screen**: tabs for Facilities, Posts, Challenges, Exercises, Programs. Each row has a quick action ("Buy pass", "Accept", "Add to workout", "Save a copy") and swipe to remove.
- **Empty state**: one line of copy and a button to Discover.
- This screen replaces Saved Facilities (3.5). One shared table backs all bookmark types, and a bookmarked facility counts as an interest signal for the WRE.

8.4 Journey (progress hub) [NEW]

- **Entry**: a "My Journey" card on Profile and a shortcut on the Track summary strip.
- **Screen (scrolling)**: time range selector (4 weeks, 12 weeks, all); header stats (workouts, average duration, total volume); Weight card (line chart and "Weigh in" button); History (recent Lift, Move and court sessions, tappable); Progress Pics (latest three from Albums, "Compare", "Add photo"); streak and badge preview.
- **Weigh-in modal**: weight, date, optional note. The latest weigh-in feeds the NASM calculator as current weight (5.1).
- **Privacy**: weight and progress photos are private by default. Sharing is always an explicit action.
- **States**: no weigh-ins yet (prompt), no photos yet (prompt to create an album).

8.5 Streaks [NEW]

- **Weekly streak**: a week counts when the user logs at least N verified activities. Verified activities are tracker-logged Lift, Move or court sessions and gym check-ins by QR. Manual Move entries do not count (consistent with 0.4).
- **Goal**: default N = 3 per week. The user can change it from 1 to 7 in Settings > App Settings > Streak goal.
- **Week boundary**: Monday 00:00, Asia/Manila time. [OPEN]
- **Streak freeze**: one per month, proposed as a GP+ perk. [OPEN]

- **Where shown**: a streak chip in the Sodia header (e.g. "5-week streak"), the Journey screen, and Profile.
- **Notifications**: "Streak at risk" late in the week if the user is below goal (send time open), and milestone messages. Both toggles live in Notifications settings.
- Streak milestones award Consistency badges (8.6).

8.6 Achievement Badges [NEW]

All badges are computed server-side from verified tracker and check-in data.

- **Launch set (12)**: Consistency (4, 12, 26 and 52-week streaks); PR (First PR, 100 kg club); Challenge (first entry, podium finish, win); Explorer (3 and 10 different facilities visited); Nutrition (7-day food logging streak).
- **Profile Achievements card**: earned count plus the top three badges, tap to open the grid.
- **Achievements grid**: earned badges in color, locked badges greyed with a progress bar toward them.
- **Badge detail**: how it is earned, date earned, progress to the next level, "Share to Sodia" (stamp format).
- **Unlock celebration sheet**: badge art, "Share" and "View" buttons, plus a push notification.
- Facility-sponsored badges are out of v1.

8.7 Personal Bests [NEW]

- **Screen**: circles for Squat, Bench and Deadlift (logged or estimated 1RM; the user can pin up to six lifts) and Move bests (fastest 5K, fastest 10K, longest run). Below that, a month-grouped timeline of PRs. Each row opens the source session.
- **Entry points**: Journey, the Lift Dashboard PR board (5.2), and a link from Profile Tab 2 (PRs and Entries).
- **Rules**: bests come only from tracker logs. If a source session is deleted or edited, the best recalculates. "Share" on any best produces a verified stamp (5.5).

8.8 Cards: Scan and Gift [NEW]

A two-button row sits under the card carousel. It replaces the Add / Send / Pay trio from the inspo. The top-right "+ Add Pass" icon stays and opens the same Join Facility modal as Scan.

- **Scan**: opens the camera. Scanning a facility's QR opens that facility's checkout (4.3). Selling non-pass items such as drinks, merch or lockers is not in v1.

- **Gift a pass** (purchase-direct, so the pass is bought for the recipient instead of transferred):
  1. Entry: the "Gift" button on Cards, or a "Buy as gift" toggle in the checkout sheet.
  2. Choose the facility and a day pass or event ticket.
  3. Choose the recipient (username search or followers list) and add an optional message.
  4. Pay with biometrics as usual.
  5. The recipient gets a gift card in their Inbox and a push notification. The pass appears in their Cards labeled "Gift from [name]".
  6. Ledger rows appear for both users ("Gift sent", "Gift received").
- **Rules**: memberships and the VIP card are not giftable. The recipient must be an existing user in v1. Normal fees and the facility cut apply.
- **Validity window and sender cancellation before first use**: [OPEN]

8.9 Deferred (not in v1) [LOCKED]

Journal, heart-rate zones, paying for non-pass items at a facility, peer-to-peer money transfers, the Explore tab and video library, paid coach program packages, and sponsored badges.

8.10 Changes to earlier sections

- **2.10 Profile**: add a Journey card, an Achievements card and a Bookmarks row.
- **2.13 Coach Profile**: the paid Programs tab is retired; coaches share custom templates instead (8.2).
- **3.5 Saved Facilities**: absorbed by Bookmarks (8.3).
- **4.1 Cards Hub**: add the Scan and Gift row (8.8). **4.3 Checkout**: add the "Buy as gift" toggle.
- **5.2 Lift**: add the Headstart button (8.1); Periodization marked GP+ pending confirmation.
- **Sodia header (2.1)**: add the streak chip.
- **Settings (Phase 6)**: add Streak goal, streak and badge notification toggles, and show GP+ benefits in Subscriptions.
- **Appendix B**: adds about 22 screens and states (Headstart, wizard, exercise bank, share sheet, Bookmarks, Journey, weigh-in, Achievements, badge detail, celebration, Personal Bests, Scan, Gift flow).

8.11 Open items from this phase

1. GP+ perk list: program wizard, periodization, streak freeze, profile badge. Partner gym discounts are only an idea.
2. Whether Periodization sits behind GP+.
3. Whether the streak freeze is GP+ only.
4. Streak week boundary and time zone, and "streak at risk" send time.
5. Gift validity window and sender cancellation rules.
6. Fee stacking: confirm whether the 15% day-pass cut and the consumer fee are one charge or two, since this changes the checkout summary.

APPENDIX A: Cross-Engine Integration Map

How data moves between modules. Designers should treat each arrow as a deep link or shared widget.

- **Sodia to Cards**: facility pill opens checkout; success adds a card and a ledger row.
- **Cards to Sodia**: QR check-in triggers the "Add a photo" push; "Share to Sodia" appears on the purchase success sheet.
- **Discover to Cards**: map pin to facility profile to checkout to card.
- **Sodia to Track**: "Accept Challenge" adds a bounty to Lift or Move.
- **Track to Sodia**: finished workouts, runs and meals produce stamps that feed stories, posts, DMs and the profile Trophy Case.
- **Track to WRE**: tracker exhaust updates the user's implicit interests.
- **Cards to WRE**: purchase history changes recommendations.
- **Sodia and Discover to Facility**: tags, reposts, challenges and map pins are free marketing surfaces for B2B partners.
- **Inbox to B2B**: staff handshake cards connect GymDash invites to the user's account. Coach bubbles open raw tracker data.

APPENDIX B: Screen Inventory (for Figma page structure)

Suggested page and frame list. About 95 distinct screens or states.

- **Onboarding (8)**: Splash, Force-update, Auth Landing, OTP, Basic Info, Preferences, Find Friends, Permission primers.
- **Sodia (24)**: Feed, Story Create, Story Viewer, Own Story Viewers, Create Post, Feed Post, Comments, Repost sheet, Quote, Create Challenge, Challenge Post, Submit Entry, Leaderboard, Activity, Inbox, DM Thread, Handshake Card, Profile (own, other, private),

Followers list, Edit Profile, Albums tab, Create Album, Album Viewer, Compare view, Facility Profile (A and B), Coach Profile.

- **Discover (7)**: Map, Pin sheet, Search overlay, Search results, List view, Saved, Location denied.
- **Cards (6)**: Hub (front and back faces), SOA row detail, Join modal, QR scanner, Checkout, Payment success and failure states.
- **Track (22)**: Food (Dashboard, Add Food, Food Detail, Manual Log, NASM Calculator, My Meals builder, Monthly Calendar), Lift (Dashboard, Active Workout, Exercise Selector, 1RM Calculator, Template Builder, Program Setup, Program Calendar, Workout Complete), Move (Dashboard, Activity Selector, Setup, Live GPS, Live Multisport, Live Court, Cardio Complete, Manual Entry, Wearables), Share Distribution and Stamp Editor.
- **Settings (12)**: Main list, Payment Methods, Subscriptions, Personal Info, Privacy, Theme and Display, Notifications, Integrations, Permissions, Support, Account actions, Switch role.
- **Safety (4)**: Report sheet, Block and Mute confirmations, Under-review state, Account-deleted flow.

APPENDIX C: Open Decisions Register

1. Fee model: flat 5-10% on all transactions vs ₱10/₱15 on one-time payments plus 5-10% on memberships.
2. Payment provider: Xendit or Maya (both about 3.5-4.5% gateway cost).
3. Minors policy and age gate behavior.
4. Whether facilities can pay for boosted cards (and labeling).
5. Resolved Oct 25: no paid coach program packages in v1 (see 8.2).
6. Duplicate challenge entries: replace with best attempt, or allow multiples.
7. Court-sport challenges (Pickleball, Padel): supported or Lift/Move only at launch.
8. Offline QR fallback for gyms with poor connection.
9. Close Friends audience on Stories.
10. Repost attribution for affiliate or referral reporting.
11. Anti-cheat thresholds for suspicious lifts.
12. Whether users can hide verified entries from the Trophy Case.

APPENDIX D: Not in this document (separate specs still to write)

GymDash (facility web/tablet), Coach Dash, Business Mode scanner and waitlist manager, Community/Registry B management and events, billing and payouts back office, and Super Admin. The B2C screens above define the inventory and pricing fields those tools must populate.
