Phase 3: Discover (Mapbox Engine)

GetPhysical B2C App Master Specification • Version 3.0

3.1 Discover Map Main View LOCKED

- **Map Canvas:** Full-screen Mapbox integration.
- **Search Bar:** Top floating bar "Search gyms, clubs, or coaches...".
- **Filter Pills:** Horizontal scroll below search (All, Gyms, Pickleball, Basketball, Run Clubs). Added NEW : Coaches, Challenges, Open Now, and a Filters button (price, distance, rating, amenities).
- **FABs:** "List View" (toggles to scrolling directory) and "Center on Me" (GPS crosshair, bottom left).
- **Dynamic Pins:**
  - *Standard:* Facility logo (Registry A or B).
  - *Event/Challenge pin:* Glowing with fire/trophy badge when facility has an active Verified PR Challenge.
  - *Coach pin (temporary):* Freelance Coach Pro hosting a public-park session can drop a 24-hour pin.
  - *Cluster pins* NEW *:* Grouped with count when zoomed out.

3.2 Interactions & Fallbacks LOCKED

- **Map Pin Bottom Sheet:** Half-height cover photo, name, distance. Shows Live Capacity or Court Status. Primary action: "View Facility". Secondary: "Bookmark", "Get Directions".
- **Challenge Badge** NEW **:** If the pin has an active challenge, the bottom sheet includes the challenge title and an "Accept Challenge" CTA.
- **Social Proof** NEW **:** Shows "3 friends have checked in here" based on social graph matches.
- **Location Denied Fallback:** Blurred map background. Message: "We need your location to find nearby clubs and challenges." Primary: "Enable Location Services". Secondary input: manual search by City/Zip.

3.3 Discover Architecture Matrix

Component	Elements & User Actions	States & Database Operations
Map Pins	Standard (Logo), Event (Fire), Coach (Temp).	Queries `facilities` coordinates. Dynamic pins render special UI variants based on active `challenges` at that location.
Location Fallback	Blurred map. Prompt for Zip Code.	Applies `blurView` to map canvas. Hard blocks discovery engine until a coordinate seed is established by the user.
List View Sort	Sortable by Distance, Rating, Price, Open Now.	Executes geospatial query via PostGIS in Supabase, merged with live capacity boolean from active check-in counts.
