Phase 4: Cards (VIP Wallet & SOA)

GetPhysical B2C App Master Specification • Version 3.0

4.1 Cards Hub & Action Row NEW

- **3D Wallet Stack:** Vertical carousel (top half of screen) holding active passes and memberships. Swipe up/down cycles cards.
- **Card Faces:** Front shows facility logo, pass type, valid until, member name. Single tap flips 180° to show ticking QR code (60-second hash), current timestamp, and manual entry code. Screen brightness auto-maxes. No biometrics required for QR flip.
- **Card States:** Active, Expiring soon (amber, within 3 days), Expired (greyed out, moves to Locker after 7 days), Paused, Day pass used today.
- **Action Row:** Beneath center card: `[+] Add` (Join Facility), `[↗] Send` (transfer pass to friend), `[$] Pay` (opens native scanner to pay via linked method at facility POS).

4.2 Fitness SOA (Statement of Account) LOCKED

- **Ledger UI:** Bottom-sheet that scrolls up over the cards stack. Header: "Recent Activity".
- **Unified List:** Single-line ledger row. Left: color icon (green payment, blue access, grey expiry). Center: Action + Facility (e.g., "Check-In Nexus", "Day Pass Twins Fitness"). Right: Date/Time above Monetary Value.
- **Event Types:** Purchase, renewal, refund, check-in, expiry, cancellation, failed payment, waitlist joined.
- **Detail Sheet NEW :** Tapping a row opens receipt (amount, service fee, payment method, reference number), facility link, and "Get Help" button. Includes Search, date filter, and PDF export.

4.3 Universal Checkout & Cards Matrix

Component	Elements & User Actions	States & Database Operations
QR Generation	Tap card to flip. Ticking countdown.	QR is a dynamic hash of `user_id` + timestamp expiring every 60s. Zero friction (no faceID). Evaluated offline via TOTP algorithm if network fails.
Send Action	Select pass, select friend, confirm.	Reassigns `owner_id` in `passes` table. Writes "Gift Sent" / "Gift Received" rows to both users' ledgers.
Universal Checkout	Radio list inventory (Day pass, Subs, Courts). Extras: Date, time, players. "Confirm & Pay" requires biometrics.	Handles Xendit xenPlatform split logic. Fee Model Hybrid: Fixed P15 for one-time passes, flat 5% on recurring subs. Writes to `wallet_transactions`.
Join Modal	"Scan QR" (standee) or Search Directory.	Scans printed Gym QR to open facility checkout. On success, injects pass into stack and prompts "Share to Sodia".
