Phase 5: Track (Trinity Engine)

GetPhysical B2C App Master Specification • Version 3.0

> The Track tab utilizes a top segmented toggle: Lift | Move | Food | Explore. Remembers the last-used segment. A "Today" summary strip sits above the toggle.

5.2 Lift Tracker LOCKED

- **Dashboard:** 7-day calendar row with check marks. Action buttons: "Quick Start", "Create Template", "Build Program". Active Bounties (accepted Sodia challenges) inject here as "Log Attempt" cards. PR board shows Epley 1RM math.
- **Active Workout Engine:** Sticky header with editable Title, Live Timer, 1RM Calculator icon. Exercise block with logging grid: Set, Previous (grayed last-time value), Weight, Reps, Status (large checkmark).
- **Rest Timer** NEW **:** Checking a set turns it green and starts a floating countdown (+15s/-15s/Skip) with haptic at zero. Auto-saves draft every set.
- **Set Types:** Warm-up, working, drop, failure.
- **Complete Modal:** Confetti UI, Metrics row, PR flags. Primary CTA: "Share to Sodia" (generates Lift Stamp).
- **Periodization Programmer:** Setup duration (4, 6, 8, 12 weeks), Progression Logic (Linear vs Percentage Based). Calendar view allows plotting templates.

5.3 Move Tracker LOCKED

- **Dashboard:** Weekly mileage ring. "Start GPS", "Sync Device" icon, "Manual Entry". Active Move Bounties shown here.
- **Universal Activity Selector:** Search bar. Grouped grid: Endurance (Run, Walk, Hike), Water (Swim), Multisport (Triathlon), Racket (Pickleball, Tennis, Padel NEW), Ball/Team.
- **Live Tracker (GPS Mode):** Top half Mapbox trail. Bottom: Distance, Active Time, Current Pace. Background tracking enforced. Crash recovery for unfinished runs.
- **Live Tracker (Court Mode):** Pulsing active timer and live HR ring (if wearable synced). Post-workout prompts for Match Result (Win/Loss) feeding Sodia rivalries.
- **Cardio Complete:** Mapbox route image, metrics, splits table. Heart-Rate Zones UI NEW : Stacked bar chart (Z1-Z5) derived from wearable time-series data.

5.1 Food Tracker & Explore LOCKED

- **Food Dash:** 4 Macro widgets (Cal, Pro, Fat, Carb). Hydration counter (tap to edit/undo). Quick-Log slider of "My Meals".
- **Logging Engine:** NLP search powered by Nutritionix ("2 boiled eggs and rice" parses directly). Barcode scanner (native camera). Offline cache for recent/favorites.
- **Target Calculator:** NASM-powered formulas based on Age, Sex, Weight, Height, Activity. Outputs BMR and TDEE. FAB "Share Daily Macros" generates closed-ring Food Stamp.
- **Explore Tab (Library)** NEW **:** Workout of the Day (WOD) card, Featured Plans carousel, Exercise Bank grid. Tapping a plan opens a summary sheet with text and looping GIFs (heavy videos restricted to encourage logging over passive watching).

5.5 Universal Share Flow & Stamps LOCKED

- **Tamper-proof Graphic Stamps:** Lift (Verified PR badge, volume), Move (Route line, pace), Food (Macro rings). System-generated, user un-editable.
- **Stamp Editor:** Drops stamp as transparent floating widget over camera/gallery photo. Pinch to resize, drag, tap to invert light/dark.
- **Trophy Case:** Every verified stamp shared to the feed auto-pins to Profile Tab 2 (PRs and Entries). Cannot be deleted, but visibility can be toggled.

Track Architecture Matrix

Component	Elements & User Actions	States & Database Operations
Bounty Injection	"Log Attempt" cards on Lift Dash.	Accepted challenges read from `user_bounties`. Starting from bounty tags the resulting `workout_logs` to the challenge for validation.
Heart-Rate Zones	Stacked bar chart (Z1-Z5).	Derived from connected wearable (Apple Health/Garmin) time-series data logged during session. Updates `activity_metrics`.
Food Logging	Nutritionix Search, Barcode scanner.	NLP parsing maps to discrete food items. Saves offline cache for recent foods. Updates `user_nutrition_logs`.
Active Workout	Grid, Set types, Rest Timer.	Auto-saves draft every set locally. Validates `personal_bests` table on completion to flag PRs.
